Work History

Company Name: Shilpra Web Technologies Pvt Ltd, Pune

Date: Jan 2024 - Present

Designation: Software Developer

Total Work Experience: 1 years & 3 months

Roles & Responsibilities

- Translating designs and wireframes into high-quality code.
- Implement client-side interactivity and functionality using JavaScript libraries and other front-end technologies to enhance user experience and optimize performance.
- Collaborating closely with the team to support projects through all phases of delivery.
- Integrate front-end components with back-end services, collaborating with back-end developers to ensure seamless communication and data exchange.

Project Details

Project: Sparkling Direct

Role: Frontend Developer

Technologies: React.js, JavaScript, React router, TypeScript, Axios, Redux-toolkit, Bootstrap,

Tools: Webpack, Git, Jira

Description: Sparkling Direct is an online gifting store specializing in Champagne, Prosecco, and wine gifts for various occasions. The platform features an intuitive UI, occasion-based product categories, and personalized gifting options like custom messages and labels. It offers free next-day delivery, secure payment gateways, and cart management for a seamless shopping experience.

- Developed dynamic UI components using React.js, focusing on delivering an intuitive and responsive user experience.

- Integrated cart persistence using local storage, allowing users to resume shopping without losing selections.
- Implemented local storage caching, reducing unnecessary API calls and improving performance.
- Collaborated with the team using Git and Jira to manage tasks and track progress effectively.

Project: Lionsgate

Role: Frontend Developer

Technologies: JavaScript, React.js, React router, Axios, Redux-toolkit, Tailwind,

Description: Lionsgate's website serves as a hub for showcasing films, TV shows, and exclusive content from the studio. The project involved a complete redesign to improve user engagement, streaming performance, and creating a streamlined and immersive experience for fans and subscribers.

- Contributed to the development of the Lionsgate website using React.js and Redux Toolkit (RTK), focusing on UI components and state management.
- Implemented key features, including API integrations to fetch and display dynamic content efficiently.
- Developed a modular carousel component to showcase featured movies dynamically
- Worked closely with the development team using Git and Jira for version control, task tracking, and agile collaboration

Project: Varma Homes

Role: Frontend Developer

Technologies: HTML5, CSS3, JavaScript, jQuery, Animate.css, Bootstrap.

Description: Varma Homes Private Limited is a real estate developer, they always believed in constructing happiness for their customers. The project's objectives were branding, marketing, and showcasing the features of residential apartments in Kochi, Trivandrum, and Thrissur. The responsive website ensures accessible information and facilitates inquiries

- Assisted in building the frontend of the Varma Homes website, developing responsive UI components with HTML5, CSS3, JavaScript, jQuery, and Bootstrap.
- Implemented interactive animations using Animate.css, enhancing user experience.
- Worked on cross-browser compatibility and ensured a mobile-first design approach for seamless responsiveness.
- Collaborated with designers and backend developers to integrate UI elements effectively.
